

Foreword

These proceedings contain the papers presented at the 39th International Conference of the Chilean Computer Science Society (SCCC 2020). The conference was held in Coquimbo, Chile, on November 16-20, 2020, and was hosted by Universidad Católica del Norte. There were 137 submitted papers, each of them was reviewed by 2 or 3 experts appointed by the program chairs. In all, 82 (59%) papers were accepted for presentation at the conference. The affiliation of the authors of accepted papers illustrates the international nature of the conference, with authors from Argentina, Belgium, Brazil, Chile, Colombia, Costa Rica, Cuba, Ecuador, France, India, Italy, Mexico, Pakistan, Peru, Spain, Turkey, United Kingdom, United States and Uruguay.

Topics of the papers are highly diverse, including databases, software engineering, recommender systems, machine learning and educative software, among others. As program chairs, we would like to thank the authors for their high-quality submissions, the audience of the presentations for their insightful questions and suggestions to the speakers, and the PC members for their timely and high-quality reviews and help with the selection process. We would like to especially acknowledge the efforts of the local organizing committee, whose collaboration helped ensure the success of the conference. Finally, we would like to thank the IEEE Chile Section C Chapter directors for their support and sponsorship.
